

This training introduces Cumulocity IoT, our robust platform for instant device connectivity and management. Short videos and hands-on labs in the free trial offer essential insights into remote asset management and analytics integration for improved business processes. Starting with an IoT overview, the course progresses with interactive sessions, optimizing learning via smartphone use. Labs provide detailed guidance, ensuring a smooth initial experience with minimal disruption

Duration: 4 hours

Achievements: Exam Pass Certificate

Learner Profile

- Users starting with Cumulocity IoT
- Business Users

Required Knowledge

No requirements

Next Steps

- Cumulocity IoT Professional course

Learning Objectives

- Cumulocity IoT Overview
- Register a Device
- Manage Assets
- Visualize a Device
- Monitor a Device

Activities

- Learning Videos & Demos
- Hands-On-Labs
- Exam
