

The Cumulocity IoT platform allows power users and developers to run real-time IoT business logic inside Cumulocity IoT based on a high-level real-time processing language, the Event Processing Language(EPL). EPL Apps provides an interface which allows you to develop so called EPL apps directly within Cumulocity IoT. The training introduces the basic of EPL and how to write your first EPL App. All sections are presented by a combination of explanations followed by demonstrations.

**Duration:** 90 min

**Achievements:** Attendance Badge

### Learner Profile

- Solution Architect
- Analytics Specialist
- Developer

### Required Knowledge

Cumulocity IoT Basic Understanding

### Next Steps

Expert modules in the categories:

- Analytics

### Learning Objectives

- Event Processing Language
- Data Type and Events
- Listeners
- Routing and Sending Events
- EPL Elements
- EPL Apps
- EPL Apps Samples

### Activities

- Learning Videos & Demos
