

EPL Apps provides an interface that allows you to develop EPL apps directly within Cumulocity IoT. This course covers how to write EPL apps which are multi-tenant aware and can be used with the multi-tenant variant of the Apama-ctrl microservice. It explores the API added to support such multi-tenant apps, its capabilities, and the limitations of the API.

Duration: 42 min

Achievements: Attendance Badge

Learner Profile

- Solution Architect
- Analytics Specialist
- Developer

Required Knowledge

- Experience with
- EPL Language
 - EPL Apps

Next Steps

- Expert modules in the categories:
- Analytics

Learning Objectives

- Multi-Tenant EPL API
- Demo
- Per Tenant Customization
- Limitations

Activities

- Learning Videos & Demos
