This training provides an introduction to Cumulocity IoT Edge, an on-site, single-server variant of the Cumulocity Core platform. It is delivered as a software appliance designed to run on industrial PCs or local servers. Cumulocity IoT Edge is installed on the same site where IoT assets are located. You will learn how to set up and install Cumulocity IoT Edge in a hypervisor, how to configure Cumulocity IoT Edge and how to setup the connection to a Cumulocity IoT cloud tenant. A number of demos show how to apply this knowledge.

Duration: 170 min   **Achievements:** Attendance Badge

Learner Profile

- Solution Architect
- Administrator
- Integration Specialist

Required Knowledge

Cumulocity IoT Basic Understanding

Next Steps

Cumulocity IoT Professional Course

Learning Objectives

- Cumulocity IoT Edge
- Installation
- Edge Configuration
- Edge to Cloud Configuration

Activities

- Learning Videos & Demos
