

The Cumulocity IoT Notifications 2.0 API allows applications or microservices to receive or process notifications generated by the use of the new Cumulocity IoT notification API in a reliable manner. In the first unit of this training you get a general overview of the Notifications 2.0 API followed by a step by step round trip illustrating the usage in detail. A demo shows how you apply this knowledge. In the second unit, you learn about the latest updates to Notification 2.0 API followed by a quick demo of one of the new features, shared token.

Duration: 45 min

Achievements: Attendance Badge

Learner Profile

- Solution Architect
- Integration Specialist
- Developer

Required Knowledge

Cumulocity IoT Experience

Next Steps

Cumulocity IoT Professional Course

Learning Objectives

- Device Integration of certified Devices
- Device Partner Profiles
- How to Connect Certified Devices

Activities

- Learning Videos & Demos
