Cumulocity IoT introduced a new UI plug-in concept in 10.16 that makes it easier to bring in and use custom extension packages in existing applications or create new applications. In this training, you will get a general overview of the concept and how to use extension packages in existing Cumulocity IoT applications. You will learn how to develop and contribute your own extension package. A series of demos will show you how to apply this knowledge.

**Duration:** 90 min        **Achievements:** Attendance Badge

## Learner Profile

- Solution Architect
- Integration Specialist
- Frontend Developer

## Required Knowledge

Cumulocity IoT Basic Understanding

## Next Steps

- Cumulocity IOT Professional Course
- Expert modules in the categories:
    - IoT Solutions
