

The monitoring of microservices hosted by Cumulocity IoT can be extended to monitor more system metrics in real time. In this learning you learn about two approaches for different monitoring use cases. Coding demos show you how to prepare microservices and set up monitoring.

Duration: 40 min

Achievements: Attendance Badge

Learner Profile

- Solution Architect
- Integration Specialist
- Developer
- Administrator

Required Knowledge

Cumulocity IoT Basic Understanding

Next Steps

- Cumulocity IoT Professional Course
- Expert modules:
 - Microservice Best Practices

Learning Objectives

- Overview
- Basic Microservice Monitoring
- Advanced Microservice Monitoring
- Log Aggregation

Activities

- Learning Videos & Demos
